Being in the circulation, pervades the whole body, and may burst oil; in disease on any part of it. No organ is fret from its attacks, nor is there one which it may not deferoy. The scrotulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venerial infection. Whatever be its origin, it is her-ditary in the constitution descending "from parents to children unto the third and fourth generation:" indeed, it seems to be the rod of him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by disposition from the blood of corrupt or ulcerous matter, which, in the lengs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptins or sores. This foul corruption, which genders in the blood, depresses the energies of life, so I hat serofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this contamination; ly has its origin directly in this contamination; and many destructive diseases of the fiver, kidneys, brain, and indeed, of all the organs arise from or are aggregated.
